[8.81] EXPLANATION OF RESULTS

Ae = *Attacker eliminated*; all attacking units in the combat situation are eliminated, i.e., removed from the map. Units in the same hexes as the involved units which were not attacking are *not* affected.

Ar = *Attacker retreat*; all attacking units are moved one hex by the Defending Player. See the rules of retreat.

Br = *Both retreat*; first the attacker moves all the defending units one hex, according to the rules of retreat. Then all the attacking units are moved one hex by the defending Player. Note that all of the defending units are retreated *first*, and then the attacking units are retreated.

Dr = *Defender retreats*; all of the defending units are retreated one hex by the attacking Player, in accordance with the rules of retreat.

Ex = *Exchange*; all of the defending units are eliminated first; then an equal or greater value of the attacking units, in terms of printed Combat Strength Points are also eliminated. The attacking Player chooses which units are to be eliminated.

De = *Defender eliminated*; all defending unit(s) are eliminated.
